Expert Calibration Services

Maxim offers calibration & repair for all makes, models and configuration of pipettes. Our levels of service range from basic preventive maintenance and accuracy checks, to ISO 17025-accredited calibrations, as well as customizable solutions.

Basic On-Site Services Include:

- Cleaning all the internal and external parts as well as the shaft, ejector and piston to high gloss look
- Replacement of the seal/lubricating as necessary
- Making the necessary adjustment & calibrating to ISO 8655 or manufacturer's specifications
- Placing smudge proof calibration sticker with next due date

On-Site Service Date:

June 4, 2024
