

Dragon Medical One (DMO) is the dictation system that is supported at Regional One Health. The system is accessible through your smart phone, after set up by IT.

1. To access the EHR link that recognizes Dragon dictation, click on the appropriate access that fits your position (see below).

Inpatient/Ambulatory

Emergency Room

2. This will open the **Nuance Dragon Medical One** sign in box. Enter your User name (Active Directory User name provided during set up) and the following drop down boxes are addressed:
 - a. Microphone is set to Nuance PowerMic Mobile
 - b. Language is set to English
 - c. Speciality is set to your Specialty

A screenshot of the Nuance Dragon Medical One sign-in interface. The background is dark gray with a large, faint, stylized blue flame logo. In the top left, the text "Nuance® Dragon Medical One" is displayed in white and blue. In the top right, there is a "Desktop Application" icon and label. The sign-in form consists of several fields: "User:" with a text input box and a dropdown arrow; "Microphone:" with a dropdown menu showing "Nuance PowerMic Mobile"; "Language:" with a dropdown menu showing "English (United States)"; and "Specialty:" with a dropdown menu showing "General Medicine". Below these fields are two buttons: "OK" and "Exit". At the bottom left, the copyright notice "© 2011-2018 Nuance Communications, Inc. All rights reserved." is visible. At the bottom right, the Nuance logo and the version number "4.0.106.3919" are displayed.

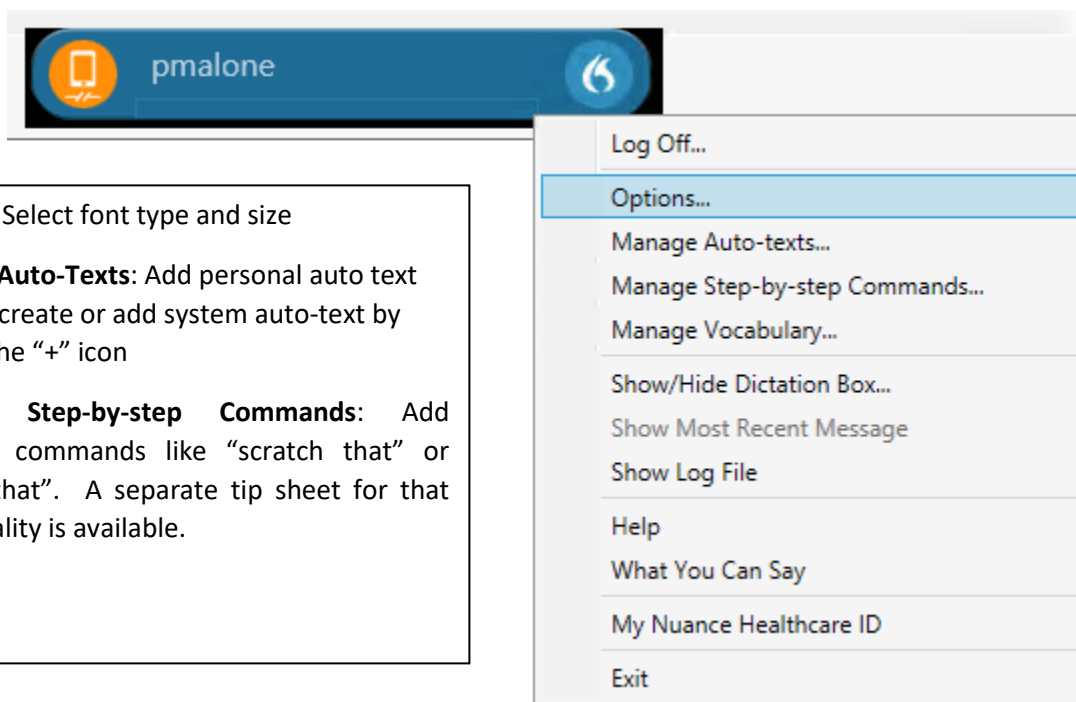

3. Click OK. This will open up your PowerMic application bar.

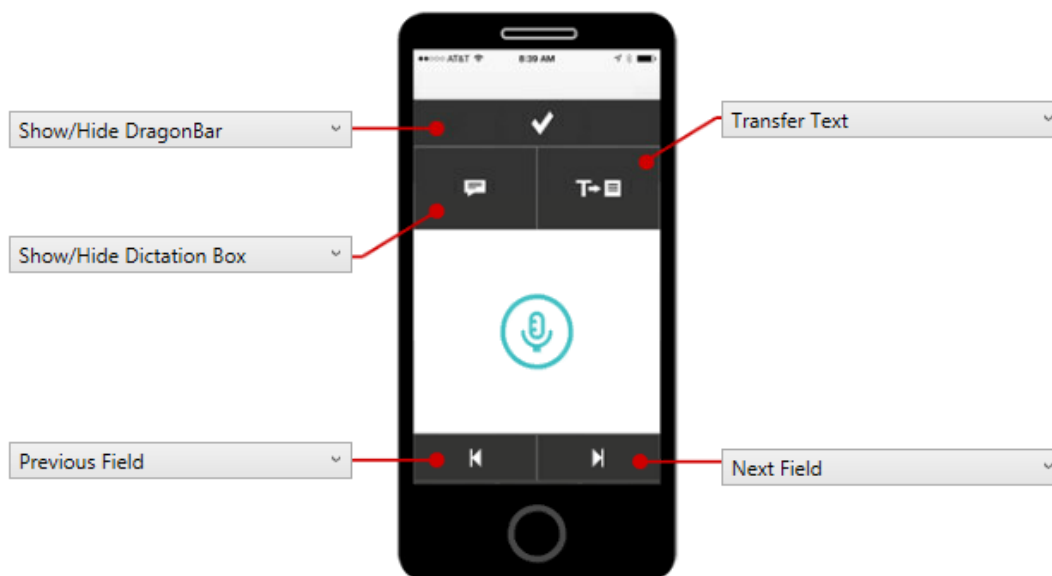

4. Click the bar and drag it to a location on the screen so that it does not block your view.

5. Before using Dragon for the first time there is set up that is required to make the system work better for you. Click on the flame icon on the right side of the microphone bar. This will open a drop down window with multiple options

6. You will need to download and use the Nuance PowerMic app on your smart phone to use the application within a patient's chart. See below for guide of icon's within the app.

7. To use Dragon Dictation while in the chart:
- Place cursor in the chart where you wish to start your dictation and tap the microphone icon on your phone screen and begin to speak your commands or dictation. You will see the text appear on your screen as you are speaking. Click within that text box to make corrections or state commands.
 - Click the Save button within each area of the chart (i.e. HPI, PE, ROS, etc.) after your dictation is completed, to make sure that what you have dictated is saved.
 - When finished working for the day, click on the flame icon on the right side of the microphone bar and select Exit to close the app.
