

NEUROSCIENCE SEMINAR SERIES SCHEDULE

Spring 2021

Andrew Kodani, Ph.D.

March 16, 2021

Assistant Member

Cell and Molecular Biology

Center for Pediatric Neurological Disease Research

St. Jude Children's Research Center

Host: Dr. Matt Ennis

Title: "Zika Virus Hijacks Centrosomes to Suppress Innate Immunity"

Raghu Vemuganti, Ph.D.

March 23, 2021

Professor

Neurological Surgery

University of Wisconsin

Host: Dr. Tauheed Ishrat

Title: "Stroke therapeutic development based on noncoding RNAs, epigenetics & epitranscriptomics"

Egidio D'Angelo, PMD.

March 30, 2021

Professor

Physiology

Director, Neurophysiology Unit

University of Pavia, Italy

Host: Detlef Heck

Title: "Multiscale recordings and models of cerebellar activity and plasticity"

Sarah M. Clinton, Ph.D.

April 6, 2021

Associate Professor and Director

School of Neuroscience
Virginia Tech University
Host: Dr. Jianyang Du

Title: “Neurodevelopment and Behavioral Consequences of Early Life SSRI Exposure”

Chun-Li Zhang, Ph.D.

April 13, 2021

Professor
Molecular Biology
UT Southwestern Dallas
Host: Dr. Fu-ming Zhou

Title: “Cell Fate Reprogramming for Neural Degeneration and Regeneration”

Henry Yin, Ph.D.

April 27, 2021

Professor
Psychology and Neuroscience
Duke University
Host: Il Hwan Kim

Title: “The basal ganglia in action”

Vittorio Porciatti, D. Sc.

May 25, 2021

James L. Knight Professor
Ophthalmology
Director and Vice Chair of Research
Bascom Palmer Eye Institute
University of Miami
Host: Monica Jablonski

Title: “Quality of Life of Retinal Ganglion Cells in Glaucoma”
